

Put your resilience to the test

Commvault Cloud Cleanroom Recovery

Be prepared for when failure isn't an option

As cyber attacks become more pervasive and increasingly intelligent, your organization's data is in the crosshairs. To ensure business continuity when the inevitable breach occurs, it is critical to have a cyber recovery plan in place. Unlike traditional disaster recovery plans, that means restoring *everything*—and doing so when your recovery environment or backups themselves are at risk of being affected. Because of this scale and complexity, regular cyber recovery testing remains out of reach for most enterprises.

[Commvault Cloud Cleanroom Recovery™](#) built on Azure is a first of its kind offering that makes testing cyber recovery more cost-efficient and accessible than ever.

66%

of organizations globally were hit by ransomware in 2023.¹

\$10.5T

predicted global cybercrime costs by 2025.²

With Commvault Cloud Cleanroom Recovery:

Complex cyber recovery testing made easy and affordable

Restore operations quickly after cyber events

Recover any workload to a verified clean Azure environment

Commvault Cleanroom Recovery is the first and only solution to date Enterprise Strategy Group has validated that enables recovery to an assured-to-be-clean environment, made possible by Commvault's any-to-any portability.

Benefits of Commvault Cloud Cleanroom Recovery on Microsoft Azure:

Test cyber recovery scenarios to ensure readiness

Enable non-disruptive forensic analysis after cyber incidents

Reduce downtime with on-demand failover environment

Simplified with automation and enterprise-grade AI

Orchestrated recovery of any workload directly to Azure

Demonstrate recoverability for cyber insurance purposes

Industry leading cyber recovery readiness with the power of Microsoft Azure

Cleanroom Recovery combines with Commvault Cloud Air Gap Protect™ to deliver unmatched data security and recoverability

Commvault Cloud Air Gap Protect

Ensure recoverability with simplified, air gapped storage

[Commvault Cloud Air Gap Protect](#) combines the convenience and scale of on-demand cloud storage in Azure with enhanced security, immutability, and predictable pricing. It's the easy button to add that critical last line of defense and recoverability without requiring any additional cloud expertise or management.

Benefits of Air Gap Protect:

- Isolated, immutable backup copies
- Turnkey data resilience & recoverability
- Meet compliance requirements
- Simplified pricing with no egress charges

Bringing the best together

Commvault and Microsoft partner to co-engineer cyber resilience solutions that help our customers safeguard their data environments, move faster, and achieve more. Together we're redefining cybersecurity and data resilience with a comprehensive platform purpose-built to secure, defend, and recover data wherever it lives with true cloud simplicity, intelligence, and scale.

Have a MACC?

Commvault solutions can help you retire your Microsoft Azure Consumption Commitment (MACC) using funds pre-approved for cloud expenditures. Contact the Commvault team to learn more: microsoft@commvault.com
